Important News!

The Digital Education Revolution student laptop program ends in 2013.

In 2014, DEC schools in NSW will be implementing the ‘Bring Your Own Device’ (BYOD) Program whereby students will be able to bring a personally owned laptop or tablet and connect to the school’s network for the purpose of education.

At Burwood Girls HS, the BYOD Program will request that all students in Years 7-9 bring their own computing device to school each day.

This device will need to meet the Device Specifications which will be published in Event and on the school’s website in November. Further information concerning the BYOD User Charter and the school’s Equity policy to ensure all students have access to digital learning will also be published.

Students in Years 10-12 who already have their DER laptops will also have the option to bring a device of their choice in 2014.
